- 7.0 Troubleshooting 9

How to use this document

Audience: End users of this platform – team members and stakeholders who view dashboards day to day. No coding or database knowledge required.

Conventions: monospace text = literal commands or code you type; < angle brackets > = replace with your value; callout boxes highlight warnings or prerequisites.

Getting Started

LifeData is the unified analytics platform for the Lifewood PH project ecosystem – real-time monitoring across PH, KE, MW, DRC, and GH.

Accessible from any modern web browser at:

PRODUCTION URL

```
https://lifedata-lifewoodph.vercel.app/
```

LifeData is built for stakeholders who need instant visibility into project metrics – participant counts, demographic breakdowns, month-over-month trends, and country-specific data tables.

Feature	Description
Real-time data	Supabase-backed live updates
Multi-region	PH, KE, MW, DRC, GH dashboards
Dark mode	Full theme support
Export	Download tables as Excel spreadsheets
Responsive	Works on desktop and tablet

Login & Authentication

Access to LifeData is protected by email/password authentication through Supabase Auth. New accounts must be created by a system administrator.

1. Open the application URL in your browser.
2. Enter your email address and password.
3. Click Sign In.
4. You will be redirected to the main dashboard.
5. If you forget your password, contact your administrator.

Note

The login page features a video background with an overlay. If the video does not load, the page remains fully functional.

CREDENTIALS FORMAT

Email: your-email@example.com

Password: *****

Dashboard Navigation

After logging in, the main dashboard displays. The interface consists of three key areas:

Area	Location	Function
Sidebar	Left panel	Navigation menu with folder groups
Header	Top bar	Project title, dark mode toggle, user menu
Content	Center	Main dashboard content area

- 1. Home – landing page with welcome message and quick links.
 - 2. BYU – Brigham Young University project dashboards by country.
 - 3. Crowdsourcing PH – Philippines crowdsourcing participant data.
 - 4. Crowdsourcing Int'l – International crowdsourcing participants.
- Click a folder to expand it; the active tab is highlighted with a green indicator.

Working with Tables

Each dashboard displays its data in an interactive table. The GenericTableDashboard component provides:

1. Search — filter rows by any column value.
2. Sort — click column headers to sort ascending or descending.
3. Pagination — navigate pages with prev/next controls.
4. Row count toggle — switch between count view and data table.
5. Excel export — download visible rows as .xlsx.
6. Column visibility — show or hide specific columns.

Tables display metric cards at the top — total count, active records, category breakdowns — each with a colored left border indicating its metric type.

Charts & Visualizations

Overview dashboards feature Recharts-based area charts showing month-over-month trends — participant growth and project activity over time.

Chart Type	Location	Data Shown
Area chart	BYU Overview page	MoM participant growth
Summary cards	All overview pages	Total, active, affiliates
Metric cards	Table dashboards	Record counts by category

Use the country filter dropdown on overview pages to filter data by specific regions. The charts update automatically when a filter is applied.

Note

Charts are interactive — hover over data points for exact values. Area charts use custom gradient fills matching the platform's color theme.

Dark Mode & Preferences

LifeData includes full dark mode support. Toggle dark mode using the sun/moon icon in the top header bar. Dark mode transforms all interface elements:

Element	Light Mode	Dark Mode
Background	Slate-50	Slate-900
Cards	White	Dark slate-800
Sidebar	White	Dark navy
Text	Dark gray	Light gray
Borders	Gray-200	Slate-700
Badges	Green/red bg	Muted green/red

Your dark mode preference persists for the session but is not saved between visits.

Troubleshooting

Issue	Cause	Solution
Blank page on load	Missing or expired session	Log out and log back in
No data in tables	Supabase connection issue	Check your internet connection, refresh the page
Login fails	Wrong email or password	Reset your password or contact admin
Charts not showing	Filter returned no data	Try a different filter selection
Slow page load	Large dataset loading	Use search to narrow results, or wait for full load
Dark mode not working	Session cache issue	Refresh the page and try the toggle again

Warning

If problems persist, contact the Lifewood PH support team. Include your browser name, version, and any error messages shown in the browser console (F12 → Console tab).
